

## Stepless adjustable sofa armrest

For the first time, this sofa armrest fitting completely dispenses with the usual and technically often susceptible locking joints and thus prevents complaints very well. The gas spring-guided central unit is particularly robust and allows a high load in any position. The fitting is characterized in particular by the absolutely stepless variable adjustment and diverse installation options in very thin-walled armrests.

### Sofa armrest

Armrest adjustment stepless

Art-No. AL 10-000200

### Functions

- Can be folded down to 90°
- Fold down after release
- No triggering within the default
- Manual operation

### Advantages

- Noiseless, stepless adjustment
- Very low adjustment force
- Can also be integrated in very slim armrests
- Stable and resilient even in the lower folding area

### Technology

- Central unit gas-spring guided
- Pivotal joints left and right
- Very slim installation dimension
- Powder-coated surface, black / galvanized
